

# CABRILLO COLLEGE

## ENGINEERING SCHOLARSHIPS

In May, the Engineering Department will award scholarships ranging in value from \$100 to \$1500 to currently enrolled students majoring in engineering. The underlying principle of these awards is to provide financial support while encouraging and rewarding excellence in academic achievement.

Awards will be made to current engineering students who will be attending college full-time in the following fall at either Cabrillo or a transfer university.

To be considered for the scholarship, engineering student must be enrolled in or have completed

- at least one semester of calculus (math 5A/5B), and
- one physics course (4A) or one engineering transfer course (1A, 5, 10, 15, 25, 35, 45) during the application year.

In selecting students to receive awards, the committee will consider especially, but not exclusively, (1) academic performance, (2) perseverance, (3) the number of lower division engineering courses completed (see list of courses on application), (4) financial need; and (5) ethnic and gender balance among applicants.

In most cases, the donors of the funds to support the awards have placed no restrictions on the recipients. However, we do have one scholarship reserved by the donor to be awarded to a Native American. Since engineering majors from this group are few, we ask that everyone make a special effort to announce this opportunity.

Application Procedure: Complete the following and submit a scanned copy of Part 1 and Part 2 (one pdf file) to Jo-Ann Panzardi at [jp@cabrillo.edu](mailto:jp@cabrillo.edu) by the due date.

- 1) Application form, including list of courses completed.
- 2) Personal statement of academic plans and career goals.
- 3) Self-addressed, stamped envelope.

## ENGINEERING SCHOLARSHIP APPLICATION - PART 1
