

This will be a fun, fast paced day of finding your own personal creative discoveries! It is also about exploring the expressive ways you can use your new sketch tool: The **PILOT PARALLEL PEN**. *This pen is essential for this class.*

You will feel comfortable and encouraged, even if you don't have any previous sketching experience. It's not about learning technical drawing skills, it's more about letting your intuitive nature play; being loose, expansive, and expressive. All in the spirit of enjoying life more fully with the art of sketching subjects in your daily lives or travels.
