Spring 2015

Seeking a well-rounded Energy Management Professional with excellent communication and presentation skills (both hands-on and discussion) and knowledge of: Solar Derived Systems; a holistic or integrated approach to sustainable project planning and construction, and Building Science principles and practices.

Desirable qualifications include the following: NABCEP, BPI, or HERS and other relative certifications. Desired experience includes: Solar Photovoltaic design and installation; Solar Thermal design and installation; building performance evaluation experience, and teaching experience relative to the aforementioned topics and professions.

In addition to the standard required application materials, please include the following:

- Any certifications relevant to the above announcement/description
- A cover letter explaining why you would make an excellent candidate for this position

Qualified applicants will be required to prepare a ten (10) minute teaching demonstration on any of the sciences listed above including the use of PowerPoint slides that support your topic overview.

* [Counseling](#)

**Fall 2014: Accessibility Support Center
(formerly known as Disabled Students
Programs and Services)**

The department is seeking an experience counselor with a history of providing academic and specialized counseling for community college students with disabilities and learning differences.

Counselors work collaboratively with other Accessibility Support Center (ASC) faculty and staff to provide accommodations and services to a diverse population. Counselors also provide student planning and academic guidance for student success.
