Cabrillo hosts exhibit, 'Sea States'

Cabrillo Gallery will exhibit Linda Simmel's collection of work, "Sea States," comprised of large-scale pencil, charcoal and pastel drawings.

The pieces were done during the course of a year and focus on the intricacies and details of bodies of water. Simmel's work was influenced by Russian mathematician Andrey Markov. The exhibit will run today through Sept. 23.

From 5-8 p.m. Sept. 8, there will be a public reception and talk with Simmel.
