Multiple Ethnicities

STUDENT DEMOGRAPHICS

Academic year 2012-2013

Source: Data Warehouse

In fall 2009, new ethnicity data collection procedures, including the option to select multiple ethnicities, were implemented in compliance with the U.S. Department of Education.

Only new students who applied and registered during this period have encountered the new survey. Continuing students were not re-surveyed; their earlier response (to a single-choice survey) remains in the system. We expect to see continued increases in the number of students selecting multiple ethnicities in the coming years.
